## From the Creator's Desk

Our new "ETERNITY COLLECTION" provides a stage for the expression through a harmonious dialogue between the romantic and the bohemian, using contemporary designs, but inspiring. A demanding design of detail and refinement of all compositional elements of the collection, emphasising colours, decor grains, fullness and emptiness, and highlighting, in essence, all those sensations transmitted by the materials of the finishes.

Design is something that has always been part of our lives, wherever we are. If you think about it, everything around us has been created using decor & design.

Colours, textures and decors aim to harmonise the elements and create a pleasant and functional atmosphere that reflects the personality and needs of the users.

At Kiyalam, we have an enormous responsibility to be part of a process that aims to rethink the existing designs and textures we already use to make laminates, reworking them in innovative ways.

Our new "ETERNITY COLLECTION" will mark the future of the laminate industry for it to be realigned towards adaptability, recombination, continuity, ease of use of materials.

"ETERNITY COLLECTION" is all about balance. Finally, one of the most important elements for every inch of design is balance. It's all about balancing the focal points of decor and texture, making sure both don't overpower each other.
